

## FILTERING CARTRIDGES

Carbon block

FILTERS

The active CARBON BLOCK filter is specific for potable water treatment by combining the action of the Carbons (softens the strong taste of chlorine and other unpleasant substances) with a 5 micron filtration.

Replace as needed and in any case no longer than 6 months.

If used for drinking purposes, make sure it undergoes a suitable disinfection after-treatment.

| CODE            | MODEL             | LENGTH | PCS |
|-----------------|-------------------|--------|-----|
|                 |                   |        | BOX |
| <b>CFPBK718</b> | <b>1300 block</b> | 10"    | 12  |
| <b>CFPBK818</b> | <b>2600 block</b> | 20"    | 4   |
